

Simple Energy, LLC partners with GivePower Foundation to provide clean water through solar energy

For every solar installation, Simple Energy, LLC will donate \$50 to the GivePower Foundation to provide clean drinking water to families in need worldwide.

TEMECULA, Calif. - Feb. 17, 2021 - [PRLog](#) -- Simple Energy, a leading provider of residential and commercial solar panel systems and with a reputation for keeping the solar panel purchase and installation process simple, today announced a partnership with the GivePower Foundation to support the construction of their innovative Solar Water Farms™. Using solar energy and battery storage, each farm can provide up to 35,000 people with safe drinking water every day. For every customer who goes solar with Simple Energy, LLC the California-based company will make a \$50 donation via the GivePower GivePartner Program.

"It was shocking for me to learn that 3 out of 10 people on the planet don't have access to clean water in their homes and that waterborne disease is actually the biggest killer in the world. By partnering with the GivePower Foundation we're giving people access to healthy water for their families and reducing the spread of waterborne diseases." said Josh Albert, co-founder of Simple Energy, LLC.

The objectives of this new partnership include:

- Provide solar energy solutions to developing regions that need them the most
- Empowering consumers with the option to save on their energy bill while making a positive and significant impact on communities around the world
- Raising awareness about the importance of convenient access to clean healthy water

3 out of 10 people in the world do not have access to safe drinking water. As a result, more than 3.4 million people die from waterborne disease. By 2025, half of the world's population will be living in water-stressed areas. With the GivePower Foundation's new Solar Water Farm™ desalination technology, they can supply clean, safe water to those in developing countries at an incredibly affordable cost. A \$20 investment can provide someone in need access to clean water for over 20 years.

"As individuals and as a company we have always been committed to making the planet a healthier, safer place for people. Now we are excited to extend our reach beyond helping homeowners and business owners in the U.S. to sharing life-changing, sustainable energy solutions with people around the world," said Josh. "The work that we do every day will now make a difference for the people who need our help the most."
