*Simple Energy, LLC continues to keep solar simple with the release of their new eBook.*

TEMECULA, Calif. ([PRWEB](#)) August 05, 2020 -- Simple Energy, a leading provider of residential and commercial [solar panels](#) services and with a reputation for keeping the solar panel purchase and installation process simple has announced the release of a new eBook, "#KeepitSimple: The Simple Energy Truth About Solar", to help change the narrative on solar energy and to help buyers of solar panels make informative purchases.

As company co-founder Nick Krahenbuhl noted the new eBook, “#KeepitSimple: The Simple Energy Truth About Solar” or simply #KeepitSimple, “is the ideal starting point for anyone who wants to learn the basics of solar power to confidently move forward with [solar panels](#).” Nick continued, “There’s a lot of questions about solar energy panels, what they can do and what they can not do, and how a solar system can benefit your home or business. #KeepitSimple aims to empower the solar panel buyer.”

In #KeepitSimple, readers can expect content focused on solar net metering and the pros and cons of leasing vs buying [solar panels](#) to federal solar tax credits in an effort to improve transparency and communication among buyers and sellers in the solar market.

Addressing some of the solar industries most common customer concerns, #KeepitSimple provides important discussion points about what to expect if you’re still paying for [solar panels](#) on a home you want to sell. With professional insights and a solar industry dictionary, #KeepitSimple helps readers regain control and make a buying decision without pressure.

Krahenbuhl concludes, “I read a [Zillow report](#) that homes with solar panels sell for 4.1% more. In California, that’s more than a \$21,000 boost in home value. Not only are solar panels smart for the environment but they are a smart buy for anyone looking to sell their home in the near future.”
